Thunderbird 2 Features

Mozilla Thunderbird 2 is more powerful than ever. It's now even easier to organize, secure and customize your mail.

Browse By Category:
• Get Organized   • Customize Your Email Experience   • Secure and Protect Your Mail
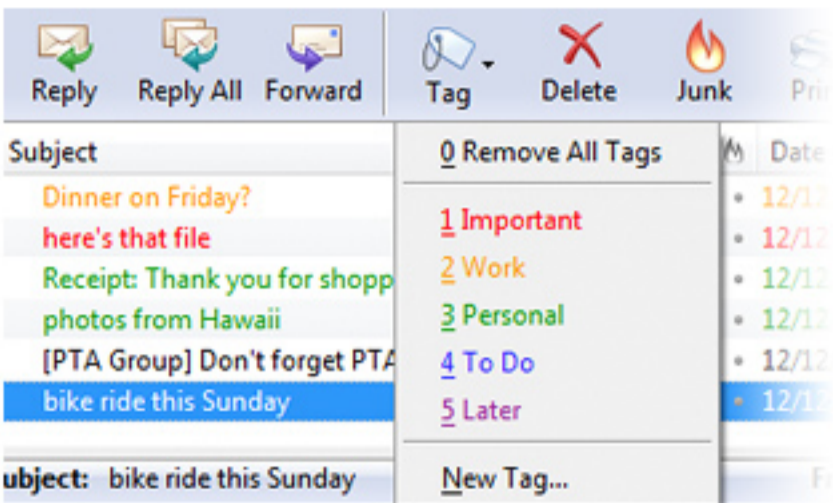

Get Organized

Thunderbird 2 includes several new features to help you manage your inbox. As you receive email, Thunderbird 2 will help you organize the most important messages to get you through your day.
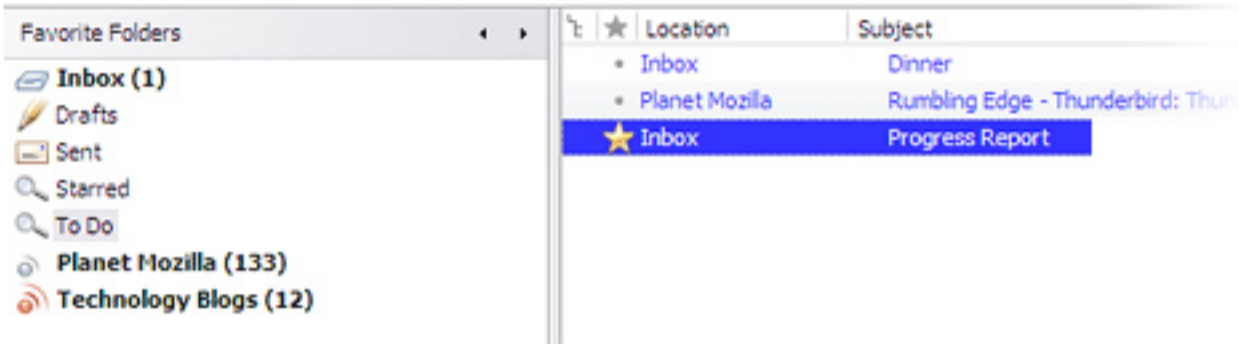

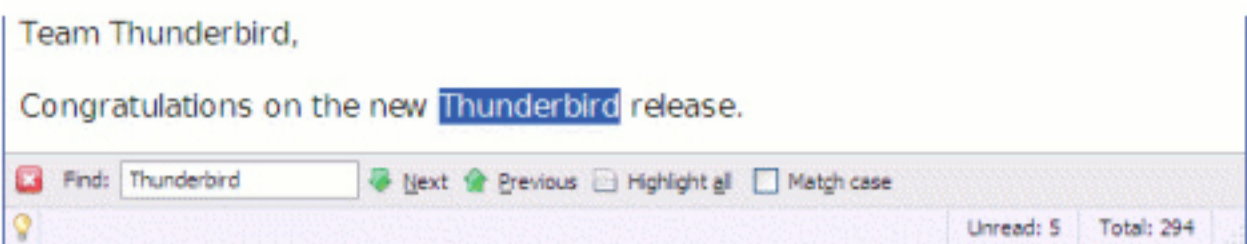

Message Tagging

Thunderbird 2 allows you to "tag" messages with descriptors such as "To Do" or "Done" or even create your own tags that are specific to your needs.

Improved Search

Thunderbird 2 features a new find bar that speeds up searches within displayed messages. Thunderbird also offers quick search, which starts showing search results as soon as you start typing in search terms.

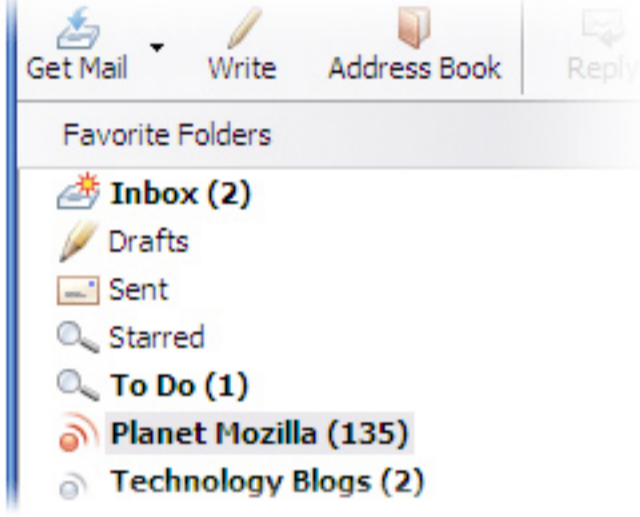

Saved Searches

Do you find yourself searching for the same subject or message content over and over? Thunderbird 2 saves you time by allowing you to store this search as a folder. Rerunning the search is just a matter of clicking on the saved search folder in the folder pane.
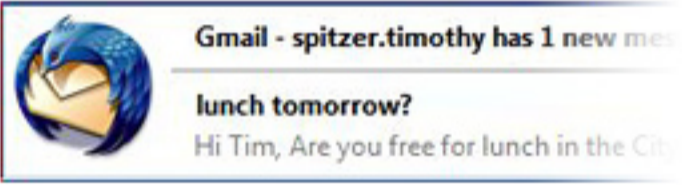

Advanced Folder Views

Thunderbird 2 offers a variety of ways for you to organize and display your folders, whether by favorites, recently viewed or folders containing unread messages. As always, you can also set up RSS and newsgroup folders to stay on top of news and your interests. Thunderbird 2 also allows you to maximize your message view pane by opting for a folder drop down menu instead of the traditional sidebar.
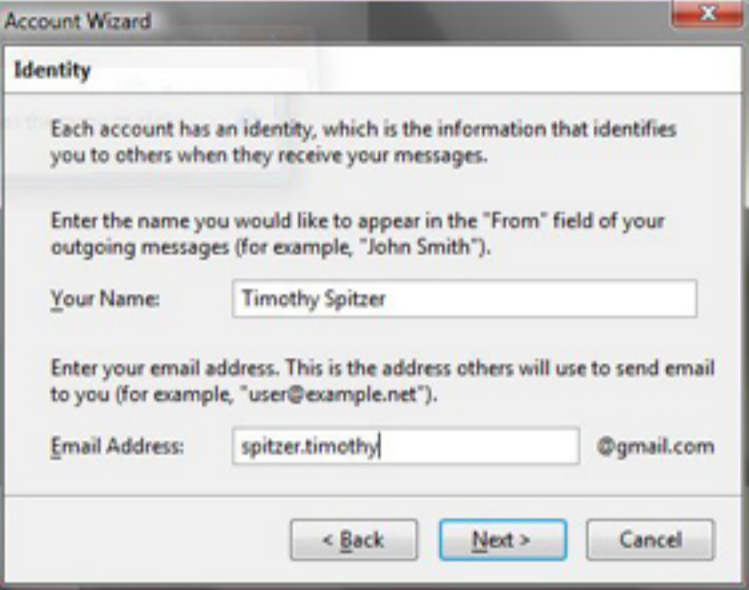

Stay Informed

Thunderbird 2 has been updated to provide more informative and relevant message alerts containing sender, subject and message text for newly arrived messages. Folders provide a pop up summarizing new messages in that folder.

Easy Access to Popular Web Mail Services

Thunderbird 2 makes it even easier to integrate and use various Web mail accounts from one inbox. Gmail and .Mac users can access their accounts in Thunderbird by simply providing their user names and passwords.

Return to top

Customize Your Email Experience

Thunderbird allows you to customize your email to suit your specific needs whether it's how you search and find messages or listening to music right out of your inbox.
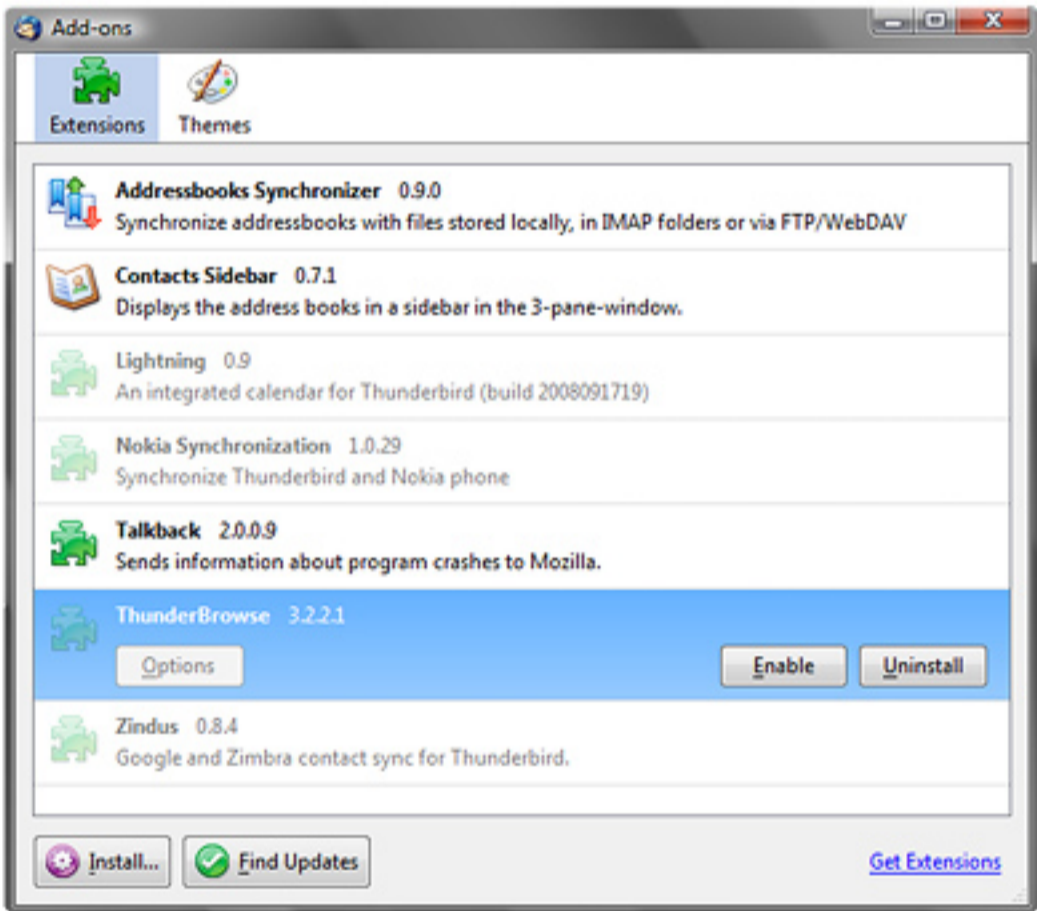

Your Mail, Your Way

Thunderbird users can increase Thunderbird's functionality and appearance using hundreds of add-ons. A Thunderbird add-on can let you place voice over IP calls, listen to music, manage contacts, and keep track of birth dates all from your inbox. You can even change the appearance of Thunderbird to suit your tastes.

Message Templates

Thunderbird 2 allows you to easily set up message templates to save you time – especially if you have to send the same mail message repeatedly.
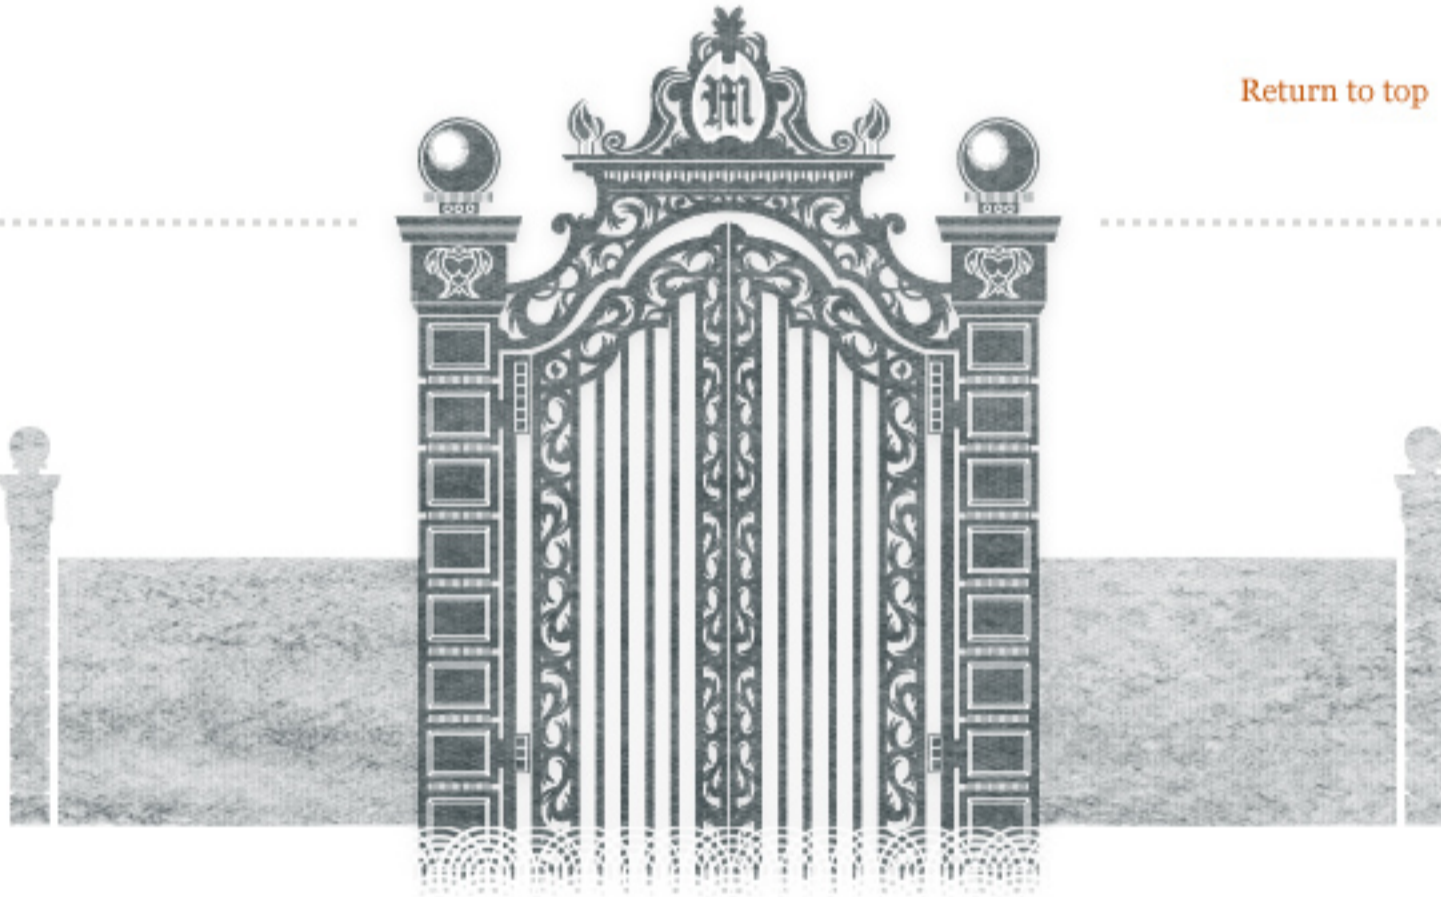

Add-ons Manager for Extensions and Themes

The new Add-ons Manager improves the user interface for managing extensions and themes, making it even easier for you to customize Thunderbird 2.

Return to top

Secure and Protect Your Mail

Mozilla has bolstered Thunderbird's security and privacy measures to ensure that your communications and identity remain safe.
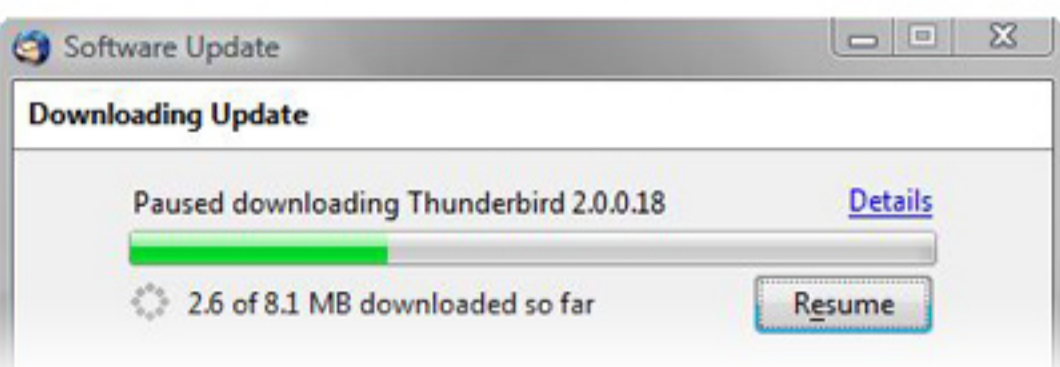

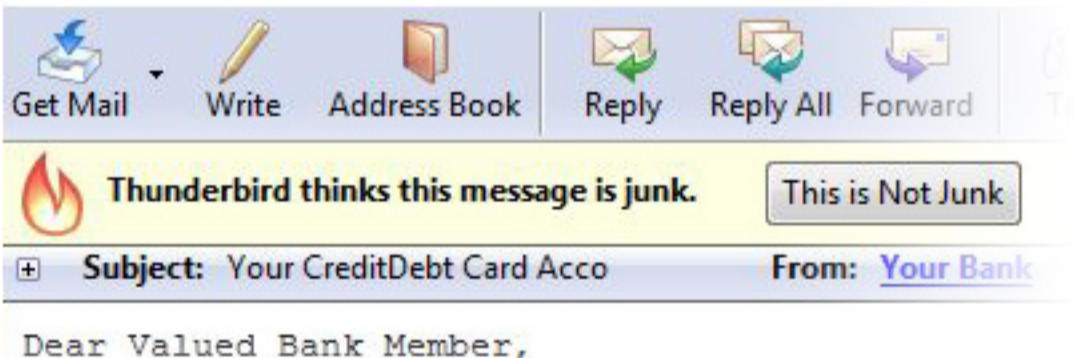

Cutting Out the Junk

Mozilla has updated Thunderbird's popular junk mail folders to stay ahead of spam. Each email you receive passes through Thunderbird's leading-edge junk mail filters. Each time you mark messages as spam, Thunderbird "learns" and improves its filtering so you can spend more time reading the mail that matters. Thunderbird can also use your mail provider's spam filters to keep junk mail out of your inbox.

Robust Privacy

Thunderbird 2 offers improved support for user privacy and remote image protection. To ensure a user's privacy, Thunderbird 2 automatically blocks remote images in email messages.

Phishing Protection

Thunderbird protects you from email scams which try to trick users into handing over personal and confidential information by indicating when a message is a potential phishing attempt. As a second line of defense, Thunderbird warns you when you click on a link which appears to be taking you to a different Web site than the one indicated by the URL in the message.

Automated Update

Thunderbird's update system checks to see if you're running the latest version, and notifies you when a security update is available. These security updates are small (usually 200KB - 700KB), giving you only what you need and making the security update quick to download and install. The automated update system provides updates for Thunderbird on Windows, Mac OS X, and Linux in over 30 different languages.

Open Source

At the heart of Thunderbird is an open source development process driven by thousands of passionate, experienced developers and security experts spread all over the world. Our openness and active community of experts helps to ensure our products are more secure and quickly updated, while also enabling us to take advantage of the best third party security scanning and evaluation tools to further bolster overall security.
